Texas Ballroom / Ticket Required
Fourth Floor

Greetings from the President

*San Antonio, Texas
March 29, 2009*

Welcome to San Antonio and NPRA's 34th International Petrochemical Conference! The IPC is the petrochemical industry's premier conference, and we're pleased to welcome participants from nearly 600 companies located in more than 40 countries to the largest, most successful and productive international meeting of its kind.

As this year unfolds, it promises to be an eventful one for the petrochemical community – and indeed for the entire world. With the change and uncertainty we face in the form of a new Administration and Congress here in the United States, and a troubled economy that impacts all of us around the globe, 2009 presents both challenge and opportunity for our industry.

Global climate change will remain a prominent issue this year, as both the Administration and Democrat leaders in the U.S. Congress have promised to seek swift action on measures to regulate greenhouse gas emissions. In the international arena, the United Nations Framework Convention on Climate Change meets this December as it continues to attempt to prepare a successor agreement to the Kyoto Protocol.

The U.S. EPA has begun implementing its Chemical Assessment & Management Program (ChAMP), which NPRA supports as a tiered, targeted, risk-based approach to chemicals management. Some members of the U.S. Congress, meanwhile, have expressed their intent to reform the Toxic Substances Control Act (TSCA), and a number of non-governmental organizations are advocating the adoption of a precautionary approach similar to the European REACH system.

Charles T. Drevna
President

Legislative efforts are also underway in the United States to amend the Chemical Facility Anti-Terrorism Standards (CFATS) to allow government officials to dictate which security measures facilities must employ. Maintaining and enhancing facility security has always been a top priority for our members, and NPRA will continue to advance the message that the owners and operators of chemical facilities already utilize the safest, most cost-effective and innovative technologies available.

This year's IPC features an exciting lineup of speakers who will explore some of the challenges our businesses face. We are glad to have internationally acclaimed economist Todd Buchholz, give our opening keynote address Monday morning. Tuesday morning's Petrochemical Forum features a panel discussion on "Capital Construction in a Volatile Environment," and Mikhail Gorbachev, former President of the Soviet Union and Nobel Peace Prize recipient, headlines Tuesday's International Petrochemical Luncheon.

With the change and challenges that lie ahead, NPRA will continue to enhance its role in shaping the chemicals-related policies of the future. We will continue to work closely with our members and policymakers to ensure that a safe, affordable, reliable supply of chemicals and fuels is available to American consumers and businesses.

We appreciate your participation in this year's IPC, and we thank you for your continued support of NPRA. The dedication and commitment of our members and their employees is what ultimately allows us to be successful in our endeavors.

We hope you enjoy all that this year's program has to offer, and we wish you a rewarding, productive meeting!

**Symposium on Entrepreneurship
and Innovation
in the Petrochemical Industry**

Awards

NPRA Distinguished Safety Award (DSA)

NPRA's most prestigious safety award is presented annually to member company facilities which have attained a superior level of safety performance in the refining and petrochemical manufacturing industries. Recipients are chosen by a selection committee comprised of members of the NPRA Safety & Health Committee. Winners will be recognized at the NPRA Annual Safety Awards Banquet to be held May 13 during the Association's National Safety Conference at The Gaylord Texan, Grapevine, Texas.

Receiving the DSA this year:

Billings Refinery
ConocoPhillips

Baton Rouge Polyolefins
ExxonMobil Chemical

Receiving the DSA Honorable Mention this year:

Borger Refinery
ConocoPhillips WRB Refining, LLC

NPRA Antitrust Policy

The National Petrochemical & Refiners Association is a non-profit, tax-exempt membership association organized to foster cooperation and the exchange of technical information among its members. These worthwhile activities are sanctioned by custom and law. It is important, however, to recognize that these activities are subject to the legal limits of federal and state antitrust laws. NPRA is committed to complying with the antitrust laws in all respects and has adopted the following guidelines in order to facilitate compliance with the antitrust laws at its meetings:

As a general matter, the antitrust laws prohibit competitors from agreeing on the prices they will charge, the products they will offer, the customers they will serve, or the markets in which they will compete. Therefore, there should be no discussion or disclosure of information with respect to (a) expected profits, premiums, prices, surcharges, or discounts; (b) specific customers or classes of customers, or whether you will or will not do business with them; (c) proposed product offerings; (d) allocation of geographic or product markets; (e) any refusal to deal with a customer or supplier; (f) how to deal with the market behavior of a competitor; or (g) any other topic involving a potentially anticompetitive practice.

Some subjects of discussion may lead to agreements that are not unlawful on their face but that may have an unlawful anticompetitive effect or may give rise to the inference of an anticompetitive act, depending upon their scope and how they are implemented. Other subjects may appear to be prohibited by the antitrust laws but in fact may be permitted because of the context or ultimate purpose of the communication. Whether discussing a subject is permissible may vary depending on factors such as the nature of the subject matter, its relationship to competition among NPRA members, the purpose of the communication, and the degree of restraint that NPRA members can be expected to exercise.

We cannot make a statement that will take the place of advice from your own company or that will cover every situation. We do suggest that those attending our meetings may avoid difficulties for themselves and for the Association by observing these principles and calling to NPRA's attention any violations you may observe at any of our meetings.

NPRA Environmental Commitment Statement

Members of the NPRA are dedicated to continuing improvement of the environmental quality of our processing facilities and products. We recognize that environmental progress and protection can be achieved only through strong commitment and constant vigilance. The members believe that environmental and economic progress is linked and that the failure to achieve either would be damaging to society.

NPRA members pledge to inform, consult, and work with their employees, the general public and government leaders in addressing concerns regarding health, safety, security, and environmental matters associated with process activities and facility operations. NPRA members support research and other advancements in science and technology which enhance environmental protection and security through efficient practices.

NPRA Entertainment Policy

We ask your cooperation in observing the Association policy on activities held in conjunction with any NPRA meeting:

- All representatives of companies sponsoring hospitality activities are expected to register for the meeting.
 - Meetings or social activities should not be scheduled that take registrants away from NPRA programs and NPRA-sponsored activities.
 - Companies are asked to restrict their entertainment outside hospitality suites to activities that do not include expensive or elaborate entertainment.
 - Any company sponsoring a function to which 75 or more people are invited should outline its plans for advance approval by NPRA. In general, such functions will be approved if they do not unduly take registrants away from NPRA-sponsored activities.
 - Hospitality suites are expected to close by 1:00 a.m.
 - Food, beverage and service personnel (bartenders, hostesses, etc.) must be obtained through the hotel catering department.
 - Suite promotional activities are to avoid the use of elaborate entertainment, expensive door prizes, suite attendance solicitation by individuals who are not full-time employees of the sponsoring company, or other similar activities.
-

NPRA Ethical Responsibility and Professional and Personal Conduct Code

The National Petrochemical and Refiners Association (“NPRA”) has adopted the following “Ethical Responsibility and Professional and Personal Conduct Code” (hereinafter, “the Code”). Every member of NPRA, their designated representatives, and non-member attendees at all NPRA meetings and forums agree to abide by the Code as a condition of membership in NPRA and attendance and participation at NPRA meetings and forums.

The Code requires the following of all individuals attending NPRA meetings and forums:

- Adherence to the NPRA bylaws and the NPRA policies and procedures, as adopted by NPRA’s Board of Directors.
- Strict compliance with federal antitrust laws.
- Adherence to all applicable federal and state laws.
- Maintenance of the highest level of professional and personal ethical behavior while attending NPRA meetings and forums.
- Prevention of certain behaviors, including harassment, violence, intimidation and discrimination of any kind involving race, color religion, national origin, gender, sexual orientation, age, disability or, where applicable, veteran or marital status.
- Assurance that conduct at all times and in all professional and personal dealings with each other and other attendees with the highest level of integrity and courtesy.
- Sharing of knowledge and expertise as speakers at NPRA educational events and sessions whenever practicable, without soliciting or explicitly promoting their own organization’s products or services.
- Working to instill public and consumer confidence in the petrochemical and refining industries, its member companies, and its professionals, avoiding any action conducive to discrediting members of NPRA.
- Refraining from scheduling general attendance meetings, receptions or other events at times that conflict with substantive programming or social events at NPRA meetings without express written permission of NPRA.

Failure to abide by the Code may result, for the first offense, in informal censure of a company or individual by the NPRA Executive Committee. If violations of the Code continue after such an informal censure, a company may be subject to expulsion from NPRA, or an individual to exclusion from participation in NPRA activities, by the Board of Directors.
