

Sunday Workshop: Refinery Clean Fuels Regulations and Compliance “101”

Topics Discussed in Workshop

- General Overview of U.S. Fuels Supply and Demand
- History of Clean Fuels Regulations
- Key EPA Concepts With Regulating Mobile Sources
- Legal Fuel Specifications: It Depends Upon Who Is Regulating
- Gasoline Regulation: From Reformulated Gasoline With the Complex Emissions Model to SIP Boutique Fuels to Sulfur and Benzene Control
- Diesel Fuel Regulation: The Eight-Year Program to Transition to 15 ppm Sulfur
- Renewable Fuels Part II: The Four Types of RINS and How the Volume Requirements Flow Back to the Refiner

In addition, the workshop will also include two biofuels presentations including:

- A presentation that focuses on the mechanisms and requirements associated with obtaining financing for a biofuel project.
- A presentation that focuses on greenhouse gas impacts resulting from a low carbon fuels standard policy.
